## **DETAILED ACTION**

### ***Response to Applicant's Amendment***

1. Based upon the submitted amendments received 3-23-2007, examiner notes that claim 27 has been cancelled, claims 1,24,28 have been amended and claim 34 has been added.
2. Examiner withdraws all rejections to all claims.

### ***Allowable Subject Matter***

3. **Claims 1-20,24-26,28-34** are allowed over the prior art of record.
4. The following is an examiner's statement of reasons for allowance:

In the examiner's opinion, it would not have been obvious to a person of ordinary skill in the art to provide baseband compensation for nonlinear behavior of rf filters only for the transmit /receive channels that are at the beginning or end of the full transmit band and the full receive band in the systems disclosed by Abdelgany (6584090), Shalom (6166601), Abdelmonem (6622028). Examiner additionally notes the distinction applicant makes between compensating for filter non-linearities and compensating for amplifier non-linearities (Remarks filed 3-23-2007, page 13). Examiner reads the 'compensation' of applicant's independent claims as only being applied to the non-linear operation of a filter (attenuation of frequencies outside the desired passband), not applied to any non-linearities caused by any 'amplification' of the selected channels.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
